Education

MSc. in Global Production Engineering and Management

Oct 2023 - Jul 2025

Warsaw University of Technology, Warsaw

Software Engineering

Jan 2023 - Mar 2024

Holberton School-ALX Africa, Remote

1. Git, C programming, Python, SQL, Bash scripting, and network fundamentals.
2. object-relational mapping, web scraping, JavaScript, SSH, Bash, C programming advanced topics, and web frameworks
3. Front-end- HTML, CSS, React.js, redux
4. Back-end-Flask, Django, Restful API, jQuery, Firebase, Appwrite
5. Database management- Mysql, Ssqlalchemy,

BSc. in Mechanical Engineering

Addis Ababa University, Addis Ababa

Employment

Data analyst

Nov 2018 - Aug 2023

Top Form Group, Ganzhou, Jiangxi, China

- Utilized Python and VBA to automate data processing and analysis tasks, enhancing data accuracy and efficiency.
- Conducted data analysis to identify areas for process improvement and assessed the effectiveness of implemented changes.
- Applied Lean methodologies and work-study techniques to identify and minimize waste, resulting in increased operational efficiency.
- Proposed strategies for improving resource allocation and operational effectiveness.

Internships

Junior Software Engineer

Dec 2023 - Present

Blue Health Ethiopia

- Developing applications by leveraging ReactJS, and TypeScript, along with the latest HTML5 and CSS3 standards;
- Crafting and sustaining your source code by adhering to TypeScript's strict typing and ES6+ JavaScript best practices;
- Technical blueprints for novel features while ensuring the robustness of existing React components using hooks and context API.
- Troubleshooting, debugging, and deploying patches for pivotal production issues utilizing React Developer Tools and Chrome DevTools
- Conducting thorough investigations into cutting-edge technologies, focusing on their integration with React ecosystems to address forthcoming business requirements.
